Foreword

For three years the Otter Tail County Fair Association has had the record of having the largest attendance and the most entertainment and attractions of any county fair in the State of Minnesota.

It is with great pleasure we present to you the 12th Annual Premium List of the Otter Tail County Fair Association. The 1921 fair promises to be the greatest fair in the history of the county, with better attractions, more premiums and an enlarged program over all previous fairs. The dates are September 27, 28, 29 and 30th.

In addition to the great agricultural and live stock show, we have a long list of high class free attractions, and every night there will be fire works. The association has engaged its pyrotechnics from one of the largest and most reliable fire works display companies in the United States, and they will give us a spectacle each and every evening of the fair. The programs will change each night.

Already we are receiving inquiries from all over the country concerning horse races, and there are sure to be more horses entered and better races even than we have had heretofore.

Let us all boost for our fair so as to keep it as it is—the largest and best county fair west of the Mississippi River.

Yours very truly,

Rib-Stone Facts

It is scientifically correct and the strongest silo on the market.

The nature of its construction makes it absolutely permanent, and Rib-Stone construction is the standard by which other makes are judged.

It is AIR AND WATER TIGHT—WIND—FIRE—AND ACID PROOF, handsome in appearance and a lucrative addition to a farm

It grows stronger and tougher with age, requires no repairs, no up-keep, no painting, and therefore, no maintenance expense.

ITS FIRST COST IS THE ONLY COST

Ninety per cent profit is made yearly by owners and feeders in their investment of a RIB-STONE SILO.

The Rib-Stone Silo makes work easy, as you can haul your crop directly from the field to the RIB-STONE and not only clears your land in one operation for yearly fall plowing, but saves fighting the cornstocks in your yard and manure pile.

Prevents waste in feed; keeps stock in good condition; makes cheap beef and milk.

An acre of corn can be placed in the Rib-Stone Silo at less cost than the same acre can be husked and shredded.

Helps utilize cheap refuse; makes it possible to keep more stock on the farm, which means more manure for the land.

Insures succulent feed in winter and dry spells when pastures fail.

Provides a balanced ration when fed with alfalfa, clover, bran, cottonseed, meal, and other protein feed

The advantages of a Rib-Stone Silo over other makes are beyond question.

specimens; crab apples of eight specimens; grapes four bunches; plums, one pint. Not more than 1 plate of any variety will be allowed in any collection competing for a premium, nor shall there be synonymous entries.

Shortage in count or measure will disqualify a sample from competition.

The superintendent will provide uniform label cards and see that they are properly attached to all fruit and vegetable entries.

The exhibitor must keep his entries in tidy condition during the time they are on exhibit. Specimens may be added to any sample to replace those which have deteriorated except while judging is in progress. The superintendent will see that any manifestly unsightly ones are removed.
